WHAT'S THE DIFFERENCE?

QUALITATIVE STIMULATORS
Deliver an electrical stimulus to a motor nerve and the response of corresponding muscle is subjectively evaluated.

QUANTITATIVE STIMULATORS
Deliver nerve stimulation plus measure and quantify the degree of muscle weakness and display the results numerically.

GiO Pressure Gauge

Real Time Digital Display of Pressure Measured

NEW!

- Displays in three pressure units: cm H_2O, mBar, kPa
- Displays peak pressure reading when Peak and Hold function is activated
- Backlight for easy reading in dim environment
- Analog bar display with colors to indicate different pressure ranges
- Auto power off preserves battery life
- Variety of gauge ranges available

Item	Description	Range	Qty	$
8-1000-01	GiO 1 Pressure Gauge	0 - 30 cm H_2O	1	**$284.95**

IntuBrite® Edge Video Laryngoscope

Exceptional Dual-LED Illumination

- Handheld ergonomic video laryngoscope
- Large 3" high resolution screen (40% larger than competition) and image with video recording
- Rotating screen variation available
- Affordable video laryngoscopy solution
- Dual-LED illumination combines white and ultraviolet wavelengths for superior tissue visualization
- Use with either reusable wand + disposable sheaths or reusable blades
- Simple to operate
- Rechargeable batteries

MR

MR Conditional Laryngoscope Kit

Complete Fiber Optic Kit

• LATEX FREE • • REUSABLE •

- Unique design - black handle and gold plated fiber optic clip offers a set that is clearly distinguishable from laryngoscopes used in other departments
- Independently certified to support MR conditions with a static magnetic field of 3-Tesla or less and highest spatial gradient field of 720-Gauss/cm or less
- High intensity xenon bulb provides ultra bright white light
- Powered by low magnetic battery for safety in the MRI suite

Item	Description	Qty	$

SunStim™ Pro

LED Screen Displays Functionality

- Ergonomic, compact shape fits comfortably in hand
- Easy-to-Read illuminated digital screen displays DBS, Twitch, Tetanus, TOF, currently intensity and battery life
- Clearly visible, finger-controlled front face buttons
- Side switch to increase and decrease level of stimulation
- Removable silicone wrap enhances grip, helps protect device

SunStim™ Plus

Enhanced Functionality

- Features two 60 milliamp burst simulation at 50 Hz, separated by 0.75 seconds
- Develops optimal output to ensure supramaximal stimulation: Output current is fully adjustable from 0-70mA
- Features 50 and 100Hz Tetanus, TOF and DBS

SunStim™

Affordable Nerve Stimulator

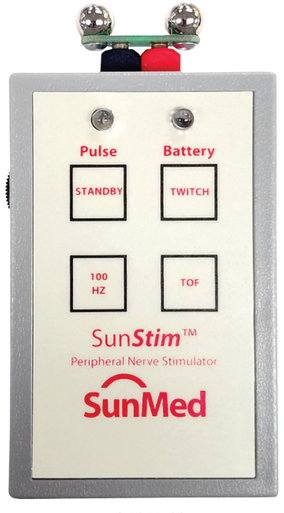

- Consistent voltage stimulator for monitoring neuromuscular block
- Evaluates muscle relaxant dosage during surgery and recovery

All three devices come ready to use! Includes: instruction manual, battery, ball electrodes, 6' leads with clips and a one year warranty.

ToFscan® Neuromuscular Transmission Monitor

Quantitative Monitoring of the Neuromuscular Blockage

• LATEX FREE • • REUSABLE •

3D ACCELEROMETRY

- Provides a realistic and complete measurement of muscle response
- Objective results for the quantitative stimulation modes
- Provides the most reliable way to ensure the absence of residual neuromuscular block
- TOF: T4/T1 & T4/Tref Count
- TPC: Count
- DBS: Count

OPTIMAL THUMB POSITION

- Adult thumb movement (contracting adductor policis)
- Does not requires calibration
- Shape of the thumb sensor designed to ensure accurate results accuracy while remaining easy to use

SIMPLE & ERGONOMIC

- Simple to use
- Operable by plug or battery
- Autonomous and mobile device
- Can be securely clamped to bed rails
- ATP mode ensures simplified and continuous monitoring of the blockage, from induction to the complete reversal of the patient

Specifications	Handheld Pulse Oximeter
SpO_2	LED numeric display 0.46" high
Pulse Rate	LED numeric display 0.38" high
Pulse Strength	Logarithmically scaled, 8-segment bar graph
Keys	ON and OFF keys, SpO_2
Range	-99% SpO2
Accuracy	± 2% at 70-99%, <70% unspecified
Pulse Rate	8 beats
Range	30-254 bpm

Fingertip Pulse Oximeter

Accurate O_2 Saturation Measurement

• LATEX FREE • • REUSABLE •

- Clinically proven precise O_2 diagnosis
- LED screen displays patient O_2 saturation and pulse rate
- Pocket size: 2" L x 1 3/8" W x 1 3/8" H
- Non-audible
- Includes lanyard strap, protective cover and carrying case
- AAA battery

FUNCTIONS INCLUDE

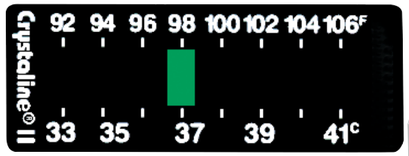

- SPO_2 measurement 30-235 BPM; Accuracy 30-99 BPM, ± 2 BPM, 100-235 BPM, ±2 %
- Auto shut off
- Low power indicator

ViaValve® Safety IV Catheters with Blood Control

Help Reduce Risk of Blood Exposure & Contamination

• LATEX FREE • • STERILE • • DISPOSABLE •

- Unique valve inside the catheter hub impedes blood flow from the patient's vein upon initial venipuncture
- Once inserted, the catheter is activated by attaching the Luer fitting of an infusion line which opens the valve to allow unrestricted flow
- Guard surrounds the retracted introducer needle for safe handling and disposal, thus preventing accidental needle sticks
- Ocrilon polyurethane catheter softens and becomes more pliable, allowing longer in-dwell
- Ribbed hub design facilitates secure catheterization

ETCO₂ / O₂ Sampling Cannula with Reflective Connector

Compatible with Leading CPAP Monitors

•LATEX FREE• •DISPOSABLE• •SAMPLE AVAILABLE•

- Compatible with Microstream,™ Capnostream™ and Oridion™ capnography monitors
- Dual nasal cannula simultaneously provides oxygen to both nostrils while obtaining CO_2 sampling during spontaneous breathing
- Designed to prevent mixing of fresh oxygen with CO_2
- Innovative scoop design suitable for mouth-breathing patients
- 3-Channel tubing prevents kinking
- Adult and pediatric sizes in three tubing lengths
- DEHP free

Filter integrated with reflective connector helps prevent moisture collection

Fits-All O_2 connector comes standard on all sizes and lengths

Scoop design effectively captures end tidal sampling from mouth breathing patients

Soft-Ears™ material ensures superior patient comfort, even during prolonged use

SALTER LABS

Parker Flex-Tip Endotracheal Tubes

Tapered Distal Tip for Non-Traumatic Intubation

• LATEX FREE • • STERILE • • DISPOSABLE •

- Designed to facilitate rapid, non-traumatic intubation
- Unique, patented design has a flexible, curved, centered, tapered distal tip
- Tapered tip is designed to flex and slide gently along the airway through the larynx, down the trachea on its curved backside without catching on airway tissue

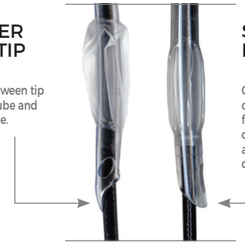

NEW!

SEE THE DIFFERENCE!

PARKER FLEX-TIP TUBE

No gap between tip of Parker tube and fiber bundle.

STANDARD ET TUBE

Gap between leading edge of standard ET tube and fiber bundle. This gap can catch on airway anatomy as the tube is 'railroaded' downward.

EXPERIENCE THE DIFFERENCE!

- Prevent Cord Damage
- Eliminate Wheel Obstruction
- Wheels Still Move Freely

Anesthesia Flush Plug

Help Reduce Exposure to Harmful Gases

• LATEX FREE • • DISPOSABLE •

- Flushes anesthetic gases through the waste anesthetic gas (WAG) scavenging system instead of flooding the operating room, reducing clinician exposure to harmful gases
- Aids in preparation for malignant hyperthermia susceptible patients requiring anesthesia
- Easily attaches to the Y-piece or gas sampling elbow of the anesthesia breathing circuit
- Priming of the anesthesia machine and circuit for mask inductions
- Suitable for leak testing of the anesthesia machine and circuit
- Protecting the anesthesia circuit or breathing circuit (respiratory therapy) from dust and debris when not in use
- Constructed of durable high density polyethylene
